

Curve Dining

Curve Dining is a modern interpretation of a classic dining chair, designed by SmithMatthias. Its bold, chunky frame gives it a strong visual weight, while its subtly awkward contours add a sense of warmth.

As an evolution of the Curve Lounge Chair, it carries forward the same sculptural language, with carefully considered components that create a cohesive design identity.

Design SmithMatthias

SmithMatthias was founded by Jack Smith and Gemma Matthias in 2014. The multi-disciplinary design studio applies a rigour and thoughtfulness to create soulful and impactful work. The studio is based in Brixton, a vibrant, bustling district of London.

Driven by the challenge to leave a positive footprint, SmithMatthias' philosophy takes

an exploratory and reductive approach by stripping a concept down to its barest essentials, considering all aspects of form and function and introducing richness through material and craft. Their creative partnership thrives on problem solving to reimagine products with intelligence, innovation and attention to detail.
