

## Sula Credenzas

The Sula Credenza is designed to complement not only the Sula Table collection but every table within the Allermuir range.

Its distinctive oversailing sides and doors create a dynamic, layered

aesthetic, where its three varying visual heights come together to form a harmonious landscape. This contemporary design allows the Sula Credenza to transition effortlessly between formal and informal settings

Design by Allermuir Design Studio

in both workplace and hospitality environments.

#### MFC Band 3 Finishes

Brown Casella Oak    Natural Casella Oak    Light Natural Casella Oak    Black Casella Oak

#### Summary of Grain Depth and Structure for Band 3 MFCs

Band 3 MFCs are part of Egger’s Feelwood range, characterised by a deeper and more pronounced grain structure compared to standard MFCs. To manage this depth and prevent damage to the decorative paper, Feelwood decors incorporate additional barrier layers. This construction enhances impact resistance, bending strength, and durability.

#### What makes the Feelwood Band 3 MFC different?

The deeper texture in Feelwood decors is synchronised with the visual pattern, creating a highly realistic wood effect. This design also results in a slight thickness increase of approximately 0.6mm.

These features distinguish Feelwood products from standard MFCs, offering superior durability and enhanced aesthetic appeal as a unique selling point.

Due to the more pronounced grain structure, Band 3 MFCs may not be ideal where a smoother finish is required.
